Compass is a library for communicate with [RouterOS 7](#). More information about RouterOS you can find [there](#). Check out the usage section for further information, including how to *Installation* the library.

Note: This project is under development.

CONTENTS

1.1 Overview

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

1.1.1 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either "meat", "fish", or "veggies". Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```

1.2 Usage

1.2.1 Installation

To use Lumache, first install it using pip:

```
(.venv) $ pip install lumache
```

1.2.2 Creating recipes

To retrieve a list of random ingredients, you can use the `lumache.get_random_ingredients()` function:

The `kind` parameter should be either "meat", "fish", or "veggies". Otherwise, `lumache.get_random_ingredients()` will raise an exception.

For example:

```
>>> import lumache
>>> lumache.get_random_ingredients()
['shells', 'gorgonzola', 'parsley']
```
